

Build your own Volcano

Ingredients needed:

Empty plastic water bottle
Red food coloring
Water
Vinegar
A Tray

Baking Soda
Dish Soap
Vinegar
Playdoh

Using a funnel, add 2 Tbsps of Baking Soda to the water bottle. Carefully, add a few drops of food coloring and 2 drops of Dish soap. Fill the bottle 80% full with water.

Place the bottle on a tray (or baking sheet). Form your volcano using playdough (be careful to not cover the top of the volcano.) Bring it outside and add a 1/4 cup of vinegar to your bottle.

You can continue to add baking soda and Vinegar to erupt the volcano again and again!
